

Celufom Further Enhances its Fastrack CAD offering

Celufom, leading manufacturer of PVC-UE roofline, cladding and window finishing products with particular expertise in the specification sector, encourages specifiers and architects to its free Fastrack CAD offering.

“The Fastrack CAD tool is a popular device allowing architects to download installation details, specification clauses and scaled drawings of our product range and use them in their building design blueprints and specification,” says Tony Crutcher, Sales and Marketing Director of the Celufom brand.

“We want to give our specifier and architect customers as much support as we can, and offering this free service on our website is just one element of that support. Visit www.celufom.co.uk for more information.”
